PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 12+ years of experience building enterprise web applications, scalable systems, REST APIs, third-party integrations, and data-intensive platforms. Strong expertise in PHP, Laravel, Node.js, NestJS, React.js, MySQL, MongoDB, Redis, AWS, Docker, CI/CD, database optimization, and technical leadership. Experienced across eCommerce, healthcare, education, and garments ERP domains.

Core Skills

Languages: PHP, JavaScript, TypeScript

Backend: Laravel, NestJS, Node.js, REST APIs, Webhooks

Frontend: React.js, Next.js, Vue.js, jQuery

Databases: MySQL, MongoDB, PostgreSQL

Caching & Messaging: Redis, Queues, RabbitMQ, Kafka

Cloud & DevOps: AWS (EC2, S3, Load Balancing, Auto Scaling, RDS), Docker, GitHub Actions, CI/CD, Deployment Automation, Dokploy, High-Availability & Scalable Infrastructure

Engineering: System Design, Microservices Architecture, Database Optimization, SOLID, Design Patterns, Code Review, Team Leadership

AI-Assisted Development & Productivity: ChatGPT, GitHub Copilot, Claude, Gemini, AI-Assisted Coding, Code Generation, Debugging, Refactoring

PROFESSIONAL EXPERIENCE

Clicko Digital — Senior Full Stack Developer (Nov 2025 - Present)

Tech Stack: PHP, Node.js, Laravel, NestJS, React.js, MySQL, Docker, AWS, GitHub Actions

- Technical Lead for Ethos Merch, a US-focused B2B and B2C custom merchandise eCommerce platform.
- Integrated supplier APIs including AS Colour, SanMar, Stanley/Stella, and S&S Activewear, along with Shopify and ShipStation integrations.
- Integrated Stripe and PayPal payment gateways to support secure and reliable and flexible payment processing for eCommerce transactions.
- Implemented inventory management functionality to track product availability, stock levels, and inventory-related operations across the eCommerce platform.
- Built webhook-driven order synchronization and processing with Shopify and ShipStation.
- Implemented Docker-based deployment on AWS EC2 with DeployHQ CI/CD and used AWS S3 for storage.
- Worked with MySQL and Redis for production data and caching workloads.
- Led a 4-member engineering team and supported technical decisions and code reviews.

iHealthScreen Bangladesh Ltd. — Senior Software Engineer (Mar 2022 – Oct 2025)

Tech Stack: PHP, Node.js, Laravel, NestJS, React.js, MongoDB, MySQL, Docker, AWS

- Led development of a Doctor Appointment and ePrescription platform covering doctor search, appointments, chief complaint, diagnosis, on examination, medical history, investigations, medications, dosage schedules, advice, follow-up and prescription generation.
- Implemented retrieval of previous prescriptions using patient ID or mobile number and support for updated prescriptions during follow-up visits.
- Designed and developed REST APIs consumed by a dedicated mobile application team.
- Developed with NestJS and React and worked with MongoDB and MySQL.
- Deployed on AWS EC2 and used AWS S3 for storage.

Independent Contractor at Apple (Jan 2021 – Feb 2022)

Tech Stack: PHP, Laravel, Vue.js, MongoDB, MySQL, Docker, AWS

- Worked as an Independent Contractor on an internal Apple Store Management system through Softzino Technologies.
- Contributed to the development and maintenance of internal store management workflows supporting employee supply requests and fulfillment operations.
- Worked on business workflows for managing product/item requests, availability, fulfillment, and internal inventory-related processes.
- Developed and enhanced backend functionality, APIs, and application features based on internal business requirements.
- Followed clean coding practices and contributed to maintaining a scalable and maintainable enterprise application.

Skylarksoft Ltd. — Technical Team Lead / Senior Software Engineer (Feb 2018 – Dec 2020)

Tech Stack: PHP, Laravel, Vue.js, React.js, MongoDB, MySQL, Linode

- Led a 5-member technical team on a large-scale Garments ERP platform.
- Developed Merchandising, Costing, Inventory, Textile, Washing, Sampling, Cutting, Printing, Embroidery, Sewing Input/Output, Finishing, Poly & Packing, Shipment and Other's modules.
- Managed high-volume data workloads and optimized system performance to ensure smooth, responsive, and reliable application operations.
- Improved reporting performance using database indexing, table partitioning, database views, and summary tables.
- Moved time-consuming processing to queue-based background jobs to reduce the impact of heavy operations on application requests.
- Deployed the application on a VPS environment.

BlueScheme Ltd. — Software Engineer (Nov 2015 – Jan 2018)

Tech Stack: PHP, Laravel, Vue.js, MongoDB, MySQL

- Developed and contributed to an Online Higher Education Management System supporting student enrollment, course management, online classes, examinations, assignments, results, faculty management, and attendance.
- Contributed to web application development and business workflow implementation.

ABH World — Software Engineer (Mar 2014 – Oct 2015)

Tech Stack: PHP, CodeIgniter, JavaScript, jQuery, MySQL

- Worked on eCommerce and Student Billing Management systems.
- Developed and maintained application features supporting business and student billing workflows.

SELECTED PROJECTS

Ethos Merch Platform: US-focused custom merchandise eCommerce platform with supplier API integrations, Shopify/ShipStation synchronization, webhooks, Redis, MySQL, Docker and AWS.

Doctor Appointment & ePrescription Platform: Healthcare platform for doctor search, appointments, digital prescriptions, diagnosis, medication schedules, follow-up prescriptions, and mobile application APIs.

Garments ERP: Enterprise production management platform covering Merchandising, Costing, Inventory, Textile, Washing, Sampling, Cutting, Printing, Embroidery, Sewing Input/Output, Finishing, Poly & Packing, Shipment modules with high-volume reporting optimization.

Online Higher Education Management System: Education management platform supporting student enrollment, course management, online classes, online examinations, assignment management, result processing, faculty management, attendance tracking, and academic administration.

EDUCATION

B.Sc. in Computer Science & Engineering
Pabna University of Science and Technology — 2014

ADDITIONAL STRENGTHS

Technical Leadership • Backend Architecture • API Design • Database Performance Optimization • Third-Party API Integration • High-Volume Data Processing • Code Review • Team Collaboration • Production Deployment • Scalable Web Application Development
